

Material Safety Data Sheets (MSDS)

The OSHA Hazard Communication Final Rules states in Section 1910.1200 (b) (5) (iv) that the Rule does not apply to “Articles.” The term Articles is defined in Section 1910.1200 (c) as “a manufactured item (1) which is formed to a specific shape or design during manufacture: (i) which is formed to a specific shape or design during manufacture: (i) which has end functions dependant in whole or in part upon its shape or design during end use, and (ii) which does not release, or otherwise result in exposure to a hazardous chemical under normal conditions or use.”

All of Eliason’s door products would be deemed to be “Articles” as described in the OSHA Final Rule. Accordingly, there is no requirement to furnish Material Safety Data Sheets.
